Assistant Professor - Computer Science and Engineering

August 2014 - ...

Microsoft Research, Redmond WA USA

Consultant - Natural Language Processing Group

August 2014 - ...

Continuing collaboration on data-driven conversation [EMNLP 2011a] that was started during my summer internship in 2009 (<http://research.microsoft.com/en-us/projects/convo/>).

Carnegie Mellon University, Pittsburgh PA USA

Postdoctoral Fellow - Machine Learning Department

August 2013 - August 2014

Proposed a new method for weakly supervised event extraction based on expectation regularization. Initiated a collaboration with researchers at US-CERT to automatically extract cybersecurity events reported on social media, including denial of service attacks, data breaches and account hijacking [WWW 2015]. Co-developed a joint model of semantic and visual word senses [CVPR 2015]. Investigated extraction of structured user profiles and major life events from user-generated text on social media [ACL 2014, EMNLP 2014].

Supervisor: Tom Mitchell

Microsoft Research, Redmond WA USA

Intern - Natural Language Processing Group

June 2009 - September 2009

Investigated conversations on Twitter. Crawled Twitter to gather a corpus of conversations. Designed a generative model of dialogue, and conducted experiments to demonstrate the feasibility of unsupervised modeling of dialogue acts in new media. Proposed data-driven response generation, identified and addressed initial challenges, developed a system and conducted experiments. This work resulted in publication at [NAACL 2010] and [EMNLP 2011a], and led to a major new research initiative (<http://research.microsoft.com/en-us/projects/convo/>)

Supervisors: Colin Cherry, Bill Dolan

Intern - Knowledge Tools Group (Machine Learning Department) **June 2008 - August 2008**
Investigated new methods for Smart Selection in the file browser domain. Proposed the idea of learning from indirect feedback in interactive machine learning. Implemented a prototype *smart file browser*, and conducted user studies. This work resulted in an award paper at [IUI 2009].
Supervisor: Sumit Basu

Intern - Data Assimilation Group

June 2006 - August 2006

Used TAU (Tuning and Analysis Utilities) to instrument, profile, analyze, and improve scalability of research and operational NRL Data Assimilation Fortran/MPI code. Taught a class on automatic instrumentation of parallel programs for NRL scientists. Presented a Seminar on scalability enhancements to NAVDAS.
